

1. Do light Achilles stretches as shown on bottom of page several times a day without aggravation, esp after exercising. Alternative exercises include bicycling, elliptical and swimming.
2. Fill plastic water bottle, freeze it, and then roll it under foot and heel in evenings for 2 x 15 min each.
3. Do not go barefoot. Wear Croc type sandals around the house instead of barefoot and try to wear shoes that are **stiffer from heel to ball of foot (stability type)**. Try OTC Powerstep or Superfeet orthotics in shoes.
4. If pain does not improve and worsens, please see a physician. More info at our website at www.pwfoot.com. If you have Fed BCBS or Carefirst BCBS, custom orthotics are generally covered.
